¹Effective October 25, 2019, the fund's name and strategy changed. The fund was previously named WBI BullBear Value 1000 ETF. Performance prior to October 25, 2019 reflects a large-cap investment strategy. The Fund now intends to invest in small, mid, and large caps.

The performance data quoted represents past performance and is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Returns less than one year are not annualized. For most recent month-end performance, please visit wbief.com.

| Russell 3000 Value TR USD | 7.48% | 26.26% | 9.32% | 8.20% | 8.29% |

IMPORTANT INFORMATION**Past performance is not indicative of future results.**

An investment in the Fund is subject to investment risk, including the possible loss of principal amount invested. There is no guarantee the Advisor's investment strategy will be successful. Value style investing involves the risk that an investment made in undervalued securities may not appreciate in value as anticipated or remain undervalued for long periods of time. To the extent that the Fund invests in dividend-paying equities, if stocks held by the Fund reduce or stop paying dividends, the Fund's ability to generate income may be affected. Small and medium capitalization companies may involve greater volatility and risk than investing in larger and more established companies. Foreign and emerging market securities carry additional risks such as currency fluctuation, economic or financial instability, lack of timely or reliable financial information, or unfavorable political or legal developments. For a full list of investment risks associated with the fund including but not limited to Debt Risk, High Yield Securities Risk, Cash Position Risk, Portfolio Turnover Risk, Quantitative Model Risk, Master Limited Partnership Risk, and Real-Estate Investment Trust Risk, please read the prospectus.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Owners of the shares may acquire those shares from the Fund and tender those shares for redemption to the Fund in creation units only. Market returns are based upon the midpoint of the bid-ask spread at 4:00pm EST (when NAV is normally determined for most ETFs). Market price returns do not represent the returns you would receive if you traded shares at other times.

SEC Yield reflects the dividends and interest earned during the most recent 30-day period covered by the Fund's filings with the SEC, after the deduction of the Fund's expenses. **Alpha:** measure of risk-adjusted excess return. Positive Alpha indicates the portfolio has performed better than its level of risk (measured by Beta) would predict.

Beta: measure of volatility relative to a given index; Beta above 1 is more volatile than the index; Beta less than 1 is less volatile. **Up and Down Capture Ratios:** used to evaluate how well a manager performed relative to an index during periods when the index is up or down. **Maximum Drawdown:** measures the peak-to-trough loss of an investment, indicating capital preservation. **Standard Deviation:** measure of volatility; greater STD indicates a more volatile strategy or index during a given time period.

Russell 3000 Value TR Index: comprised of Russell 3000 companies with lower predicted and historical growth rates.

Benchmark shown was effective 10/25/2019, prior benchmark comparisons could have been better or worse over the same period and are not indicative of future performance.
