Dividend Frequency	Quarterly

INVESTMENT STRATEGY

WBIT aims to optimize risk and return by looking first to the Equity Model when conditions are deemed favorable for equity. If the model indicates conditions for risk are high in equities, we then look to the Bond Model to determine preference for bond type and duration or cash.

The performance data quoted represents past performance and is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Returns less than one year are not annualized. For most recent month-end performance, please visit wbiefts.com.

Sectors and holdings are subject to change at any time and are not recommendations to buy or sell any security.

Tame the Bear. Run with the Bull.®

EQUITY MODEL

Combines macroeconomic factors and technical market trends into one model to produce a "risk on" or "risk off" indication. If the model indicates that risk conditions are low for equities, the strategy will be invested in either U.S. All Cap, Large Cap or Small and Mid-Cap equities and ETFs.

BOND MODEL

Consists of two independently calculated models; a Quality Model and a Duration Model. The models assess conditions likely to affect the relative performance of U.S. High Yield Bonds, U.S. Investment Grade Corporate Bonds, and U.S. Treasuries and determine their sensitivity to credit quality and duration.

STANDARD PERFORMANCE

As of 12/31/2019

	1 Month	3 Month	6 Month	Since Fund Inception
WBIT NAV	0.90%	0.92%	3.87%	7.45%

Russell 3000 TR USD	2.89%	9.10%	10.37%	16.01%
Barclays US Agg Bond Index	-0.07%	0.18%	2.45%	4.40%

IMPORTANT INFORMATION

Past performance is not indicative of future results. Investing involves risk including loss of principal. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The value of debt securities held by the Fund typically changes as interest rates change, as demand for the instruments changes, and as actual or perceived creditworthiness of an issuer changes. During periods of rising interest rates, the market value of the debt securities held by the Fund will generally decline. The debt securities that are rated below investment grade (i.e., "junk bonds") are subject to additional risk factors such as increased possibility of default liquidation of the security. An investment in the Fund varies with the success and failure of the Sub-Advisor's investment process and strategies and the Sub-Advisor's research, analysis, and determination of portfolio securities. Other Fund risks include but are not limited to portfolio turnover risk, small and mid-cap risk, ETF and other investment company risk, premium/discount risk, and valuation risk. Additional details regarding the risks of the Fund can be found in the prospectus.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Owners of the shares may acquire those shares from the Fund and tender those shares for redemption to the Fund in creation units only. Market returns are based upon the midpoint of the bid-ask spread at 4:00pm EST (when NAV is normally determined for most ETFs). Market price returns do not represent the returns you would receive if you traded shares at other times.

SEC Yield reflects the dividends and interest earned during the most recent 30-day period covered by the Fund's filings with the SEC, after the deduction of the Fund's expenses. **Bloomberg Barclays US Aggregate Bond TR Index:** a component of the US Universal Index and covers the USD-denominated, investment-grade, fixed-rate, taxable bond market of SEC-registered securities. **Russell 3000 TR Index:** a market-capitalization weighted index that measures the performance of the largest 3,000 U.S. companies representing approximately 98% of the investable U.S. equity market.
